

# GRUNDOCRACK

## Dynamic pipe Bursting

Over 10 million meters of pipes have been replaced by Pipe Bursting

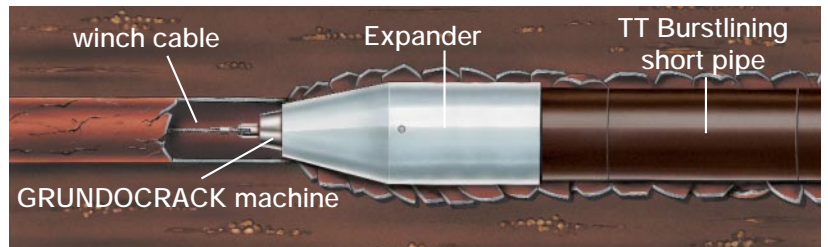

Winch (capstan)

A pipe bursting machine **GRUNDOCRACK** is pulled through the defective pipe. Its dynamic impact energy bursts the old pipe and displaces the fragments into the surrounding soil. A new pipe, either the same size or larger, is pulled in simultaneously.

Winch boom lowered into the pit

### ● Big Points

- Environmentally friendly trenchless pipe installations
- Applicable for almost all types of damaged pipes
- Increased capacity by one or two nominal pipe sizes is possible
- Long pipe lengths without joint sockets and pressure pipes can also be replaced
- Innovative, quick, avoids unwanted social costs
- Long life guarantee for new pipes
